

GATTEFOSSÉ AT UNIVERSITÉ DU QUÉBEC À CHICOUTIMI

On November 10th, Gattefossé was invited by the Université du Québec à Chicoutimi (UQAC) to give a seminar on sensory analysis to the first class of the new DESS program of Cosmetology. The discussion focused on how the use of sensory analysis and its statistical interpretation can help develop highly sensorial formulations, but discussions also revolved around Zin'Cîte™ and Hema'Tîte™, two anti-aging mineral extracts; Malt Secrets, a malted barley derived natural anti-oxidant and Gatuline® Radiance, a highly substantiated active bringing innovative mechanisms of action to improve skin radiance and luminosity.

This partnership with UCAQ is a perfect fit with some of Gattefossé's core values: knowledge sharing and contribution to education.
